

PS 2.6

MOBILIZING FINANCIAL RESOURCES FOR CLIMATE AND HEALTH

| BACKGROUND

This event will focus on a financing approach to mobilizing resources for climate and health

The impacts of climate change on health are significant and growing. At the same time the health sector is a non-trivial contributor to national greenhouse gas emissions. More resources clearly need to be secured to tackle these climate-related health risks and to decouple the climate impact of delivering healthcare. Resources are needed from both the adaptation and mitigation perspectives. There are already interventions and policies that can be integrated into health programming and scaled to realize the co-benefits when the right financing conditions are put in place. This event will focus on two topical examples, one with more of a mitigation focus energy and health – and its role in sustainable cooling and solarization, and one with an adaptation and resilience focus – Pandemic Prevention Preparedness and Response.

| OBJECTIVES

- Describe financing (including climate financing) opportunities to enable action at the intersection of climate and health
- Discuss examples of where implementation on the ground has been facilitated by availability of sufficiently **timely** and **substantial** financing

Panelist / Speaker

Maria Neira

Assistant Director-General, a.i., Division of UHC/Healthier Populations and Director, Department of Environment, Climate Change and Health

World Health Organization
Switzerland

Dr Maria P. Neira is the Director of the Department of Environment, Climate Change and Health at the World Health Organization. Prior to that she served as Under-Secretary of Health and President of the Spanish Food Safety Agency.

Dr Neira began her career as a medical coordinator working for Médecins Sans Frontières (Doctors Without Borders). She then spent several years working in different African countries during armed conflicts.

Dr Neira is a Medical Doctor by training, specialized in Endocrinology and Metabolic Diseases in Paris, France, Master of Public Health and a University Diploma in Human Nutrition, Epidemic Preparedness and Crisis Management.

Among many distinctions, she has been awarded the Médaille de “L'Ordre National du Mérite” by the Government of France and received an “Extraordinary Woman” award by HM Queen Letizia of Spain. In early 2019, she was nominated among the top 100 policy influencers in health and climate change.
