

PL 2

OVERCOMING CHALLENGES AND HARNESSING OPPORTUNITIES FOR HEALTH AT THE BIODIVERSITY-CLIMATE NEXUS

| BACKGROUND

Unabated biodiversity loss, climate change and pollution are the leading global health challenges of our time. Our dysfunctional global food system is at the heart of this “triple planetary crisis” and holistic multisectoral approaches to health, such as One Health and planetary health, are at the heart of solutions to bridge the persistent and growing health challenges they pose. At the same time, ecosystem-based approaches, or nature-based solutions, that embed health co-benefits offer essential opportunities to meet the adaptation and mitigation commitments set out in the Paris Agreement and post-2020 Global Biodiversity Framework, when combined with food system transformation, technological innovation, a green energy transition and the necessary socio-political and economic conditions to achieve equity and social justice.

| OBJECTIVES

The overall aim of sub-theme 2 will be to take in-depth look at the common drivers of biodiversity loss, climate change and pollution, and the impact of these environmental determinants, coupled with social, political and economic determinants on health outcomes. It will focus both on underlying systemic challenges at this nexus and key opportunities to overcome them in the path toward sustainable transformational change. It will further seek to catalyze health leadership, from local to global levels, by drawing on existing evidence and knowledge through more coordinated, ambitious and inclusive multi-sectoral approaches to inform evidence-based policies and actions. It will also seek to identify key opportunities to maximize health co-benefits and minimize trade-offs at the biodiversity-climate nexus, and to build both social and ecological resilience, and resilient health systems and societies, in the face of global environmental change.

Panelist

Kobie Brand

Deputy Secretary General of ICLEI, Regional Director of ICLEI Africa, and Global Director for the ICLEI Cities Biodiversity Centre

ICLEI - Local Governments for Sustainability
South Africa

Kobie Brand is the Deputy Secretary General of ICLEI - Local Governments for Sustainability, Regional Director of ICLEI Africa and Global Director of ICLEI's Cities Biodiversity Centre.

Kobie has more than 25 years of practical and managerial experience in Environmental Management and Urban Development. Her expertise ranges from biodiversity, climate change, coastal management to urban sustainability and planning.

She is responsible for the strategic direction, growth, partnerships, programmes and scope of work for ICLEI in Africa, as well as for ICLEI's global biodiversity and nature-based solutions work and related agendas. This includes the global CitiesWithNature partnership initiative and ICLEI's One Health, and water and sanitation initiatives.
